2nd UPDATE

Sorry for the multiple emails, but, as always with reservoir management operations, things change by the day and sometimes by the hour. The Bureau of Reclamation just declared an unlimited Uncontrolled Season. Which means we have access to as much water as we can move currently. The Bureau is expecting this to last from today until May 28. That being said, Pixley growers can now recharge water for groundwater credits. As always, call the office to place your order.

Sincerely,

Eric Limas

General Manager
