

February 8, 2023

LTRID Update

The Bureau of Reclamation announced that Uncontrolled season releases will end on February 9. At that point, they are increasing the Class 1 allocation from 35% Class 1 to 50% Class 1 through the remainder of February. The March 1 allocation will be announced at a later date. The increased allocation, in addition to agreements the District has in place to take water, means Lower Tule will be running through the end of the month and potentially into March.

The Friant Kern Canal is anticipated to be at full capacity for the next several days and potentially moving forward so the flows into the District may fluctuate from time to time. If flows into the District are reduced, District canals will have to be prorated and waiting lists for orders instituted.

As always, with Flood Operations, things change quickly. Keep looking for email updates.

As always, if you have any questions, feel free to call the office.

Sincerely,

Eric Limas
General Manager
