

Lower Tule River Irrigation District Water Supply Notices

June 10, 2025

The Lower Tule River Irrigation District Board set the following rates related to groundwater use for 2025.

- Base Fee covering implementation of the GSP and SGMA regulations – \$1.27 per acre-foot. This applies to all groundwater use.
- Transitional Fee – \$125.73. This applies the Transitional water use, as it is used.
- Exceedance consumption fee – \$810.84. This fee was set, per Policy 8 of the GSP Rules and Regulations and is a consumption fee for exceeding the amount of groundwater credits available in a landowner's groundwater account. This is in addition to the SGMA penalty of \$500 per acre-foot. If you get close to running out of groundwater credits in your account, the District will notify you so you can rectify the situation. It is recommended that all landowners pay close attention to their groundwater balances, and make groundwater purchases from others if needed.
