

Pixley Irrigation District Water Supply Notices

January 13, 2026

1/13/2026 UPDATES IN BLUE

We have been able to secure some water for Pixley that needs to be run by the end of January. Here are the details of the run:

- We will start filling the system on Monday
- Deliveries to growers will start on Wednesday
- The water will be treated as flood water: **landowners can use it for Irrigation, landowner recharge basins, flooding fields for credits, etc.**
- Landowners can start placing orders with the office on Monday morning.
- The Board will be meeting Tuesday afternoon to set the rate. We will send an updated email after that. **The Board set the rate at \$150 per acre-foot. Again, this water can be purchased and recharged for credits in your accounts.**
- **For those with no access to the District distribution system, after the run is over, the Board will look at how much water the District was able to recharge and determine whether there is an amount that can be offered for sale to those folks.**

As always, place your orders with the office prior to 9:00 am each day for next day delivery.

Sincerely,

Eric Limas

General Manager
