Pixley Irrigation District Groundwater Sustainability Agency
Groundwater Planning Commission Meeting
August 25, 2026
Location: 357 E. Olive Avenue, Tipton, CA 93272
Time: 10:00 a.m.

The meeting will be conducted as a hybrid in person/virtual meeting. Virtual participants may participate in the meeting on the Zoom link below:

Link: https://us06web.zoom.us/j/2960369886?pwd=6z2QF9Sbb0EcJH3EFTIiRlWtsYbjUy.1

Meeting ID: 296 036 9886
Passcode: 717592

1. Public Comment
   Members of the public may directly address the members of the Committee on any item of interest to the public before or during the consideration of the item. Public comment times may be limited to five minutes each.

2. Discussion Items:
   a. Subbasin Coordination Update – Interim Plan Alternatives
   b. Schedule and Workplan for Remaining Meetings in 2026
   c. Consideration of Alternative Water Allocation & Accounting Options and Subsidence Management Actions for 2027

3. Next GPC Meeting:

   Tuesday September 29, 2026 – 10:00 a.m.

Undesirable Results Criteria

SGMA established six criteria for undesirable results these are described as one or more of the following effects caused by groundwater conditions occurring throughout the basin:

1. Chronic lowering of groundwater levels indicating a significant and unreasonable depletion of supply if continued over the planning and implementation horizon. Overdraft during a period of drought is not sufficient to establish a chronic lowering of groundwater levels if extractions and recharge are managed as necessary to ensure that reductions in groundwater levels or storage during a period of drought are offset by increases in groundwater levels or storage during other periods.
2. Significant and unreasonable reduction of groundwater storage.
3. Significant and unreasonable seawater intrusion.
4. Significant and unreasonable degraded water quality, including the migration of contaminant plumes that impair water supplies.
5. Significant and unreasonable land subsidence that substantially interferes with surface land uses.
6. Depletions of interconnected surface water that have significant and unreasonable adverse impacts on beneficial uses of the surface water.
